Our
**environmental,
economic and
social charter**

www.hoteldresscode.com

The Dress Code is a 33-room boutique hotel located in the Opera district of Paris. It welcomes a French and international clientele, both business and leisure, wanting to experience the excitement of Paris up close. We are aware of our responsibility towards the planet and we wish to commit to integrating environmental concerns into all our operations. We have therefore established this environmental charter in order to formalize our commitments and to raise awareness among our entire team, our partners, our suppliers and our customers of the importance of preserving the environment.

What is CSR and why get involved?

CSR stands for Corporate Social Responsibility. That is to say the voluntary integration by companies of social and environmental concerns into their commercial activities and their relations with stakeholders. In other words, CSR is the contribution of companies to the challenges of sustainable development. A company that practices CSR will therefore seek to have a positive impact on society while being economically viable.

Aware of the impact that tourism can have on the planet, we have decided to make commitments, in accordance with our values, to continue to receive our customers with concern for their comfort, in a responsible manner.

Our commitments

1. We raise awareness among our teams and our customers

Management training

Our director, also the company's environmental manager, has followed specific training on the issues of sustainable tourism, environmental preservation and CSR.

Team training

Our team is also involved and aware of these issues. They know the actions to follow in their daily tasks. Our employees have received comprehensive environmental training.

French partners

We choose to collaborate with French service providers and suppliers, local wherever possible, committed to sustainable development.

Smooth travel

We encourage travel by public transport, on foot or by bike.

2. We control and save resources

Insulation

The hotel opened in 2018, so the renovation of the hotel is very recent and its insulation is optimal. This allows us to reduce our energy consumption.

Water

Our toilets have two buttons so you can opt for a half flush and our taps are equipped with aerators.

Electricity

Electricity only activates when necessary in many places, we have presence detectors / timers to limit energy waste. We keep a table tracking our electricity consumption.

Thermostats

Our rooms are equipped with individual thermostats. We encourage our customers to use heating and air conditioning responsibly. Room thermostats are turned off when not rented.

Lighting

All of our lighting is LED, which saves energy. A magnetic key activates and deactivates the lighting in the rooms.

Reuse

We inform and invite our customers to reuse their sheets and towels thanks to a card in the room in order to limit the consumption of water and detergent.

3. We limit and sort our waste

Recycling

We have installed several sorting points internally and for the attention of our customers (recyclable / non-recyclable). The glass is thrown into a special bin and food waste is collected separately to be repurposed and transformed into compost.

Bulk

We work with a majority of bulk or large packaged products to limit unnecessary packaging (e.g. welcome products are in large format).

Less plastic

We limit the use of plastic as much as possible. We have removed plastic bottles from the rooms and installed a water fountain in our lobby.

Reusable

We do not offer any disposable tableware.

4. We favor sustainable purchases

Breakfast

We choose French and organic products as much as possible for our breakfast. We offer a selection of products adapted to different specific diets: gluten-free, dairy-free, vegetarian.

Anti-waste

We control our restocking in order to avoid food waste as much as possible. Uneaten food from our breakfast remains available to customers and the team during the day.

Cleaning products

Our cleaning products are biodegradable and eco-labeled. We promote steam cleaning whenever possible.

Linen

Our linen supplier, Elis, is located in the Paris region, so as to limit travel time between our hotel and their premises.

5. Our approach is inclusive

Elevator

Our hotel has a talking elevator with braille buttons.

PRM Welcome

We have two rooms equipped for People with Reduced Mobility.

Apprentices

We welcome young people in apprenticeships.

No discrimination

No discrimination is tolerated in our establishment. We respect equality between women and men.

Dress Code Earns the Green Key Label: A Strong Commitment to Sustainability

We are proud to announce that our hotel has officially been awarded the Green Key label, an international recognition of our commitment to sustainable tourism and environmental preservation.

This label rewards our efforts to adopt eco-friendly practices on a daily basis: optimized water and energy management, waste reduction, use of local and organic products, and raising awareness among our guests and team about sustainability.

Earning the Green Key is more than just an achievement - it's a mission. We strive to offer our guests a unique experience where comfort and environmental responsibility go hand in hand.

We sincerely thank our team and guests who share our commitment to a greener and more responsible way of traveling. Together, we can build a more sustainable future!
